EDUCATION

Dayananda Sagar College Of Engineering	2029
<i>B.E. Computer Science and Engineering (VTU)</i>	<i>GPA: 9.38</i>
HKS pu College	2025
<i>Pre University Course (PCMB)</i>	<i>percentage: 95.83</i>

SKILLS

Languages: C++, C, Java, Python, JavaScript, HTML, CSS
Android: Kotlin, Jetpack Compose, Android SDK, Room, WorkManager, Material 3, Retrofit
Backend & Databases: REST APIs, FastAPI, PostgreSQL
Developer Tools : Git, GitHub, Android Studio, VS Code

PROJECTS

Kisan Suvidha | *HTML5, CSS3, JavaScript*

- Developed a responsive agricultural web platform using HTML5, CSS3, and JavaScript to provide farmers with accessible information and essential farming resources.
- Implemented dedicated modules for weather updates, market information, and agricultural resources, with reusable JavaScript components for navigation and page elements.
- Deployed the application on Vercel and managed source code using Git/GitHub.

iTantra — STT/TTS | *Kotlin, Android, STT, TTS, Wi-Fi/Bluetooth, Sockets, Git, Android Studio*

- Developed a multilingual Android communication system supporting speech-to-text and text-to-speech across 10 languages
- Implemented phone-to-phone communication over Wi-Fi/Bluetooth using socket-based messaging
- Designed reliable message delivery using acknowledgements, timeout-based retries, retry limits, and automatic reconnection
- Implemented priority-based handling for emergency messages to improve delivery reliability

Expense Tracker | *Kotlin, Jetpack Compose, Room, MVVM, Kotlin Flow, WorkManager, Material 3, Git*

- Developed an offline-first Android application for managing expenses, budgets, categories, and recurring transactions using Kotlin and Jetpack Compose
- Implemented MVVM architecture with Room Database and Kotlin Flow for reactive local data persistence and state management
- Built budget insights, category-based analytics, and visual spending reports to help users monitor financial patterns

ACHIEVEMENTS

LeetCode | *250+ Problems solved , 100-Day Streak* June 2026 – Present

- Solved 250+ algorithmic problems covering arrays, strings, data structures, algorithms, and SQL

Zero to One Hackathon | *Top 5* June 2026

- Secured a Top 5 position in a college hackathon as part of a team during the first hackathon participation

OPEN SOURCE CONTRIBUTION

NexusAI | *TypeScript, React, Next.js, Git, GitHub*

- Contributed to an open-source AI application by addressing an issue related to error feedback and toast notifications
- Improved toast positioning and display duration in the chat interface
- Created a dedicated Git branch, implemented the changes, committed them, and submitted a pull request for maintainer review
